Education

University of St. Thomas

May 2026

Bachelor of Science in Computer Science, Minors in Art History & Data Science

St. Paul, MN

GPA: 3.68/4.0

Dean's List: 6 semesters

Clubs: Computer Science, eSports, Nexus

Relevant Coursework: Data Structures-Object Design, Algorithms, Artificial Intelligence, Computer Architecture, Database Design I, Web Development, Information Security, Object Oriented Design & Programming, Discrete Math, Calculus I & II, Applied Regression Analysis, Data Mining & Machine Learning

Technical Skills

- **Programming Languages:** Java, Python, C, SQL, JavaScript
- **Tools & Environments:** Git, IntelliJ, Visual Studio, Eclipse

Projects

St. Paul Crime SPA | VueJS, JavaScript, HTML, CSS, SQLite3, REST API, Leaflet, Nominatim

- Collaborated with two peers to create a single page application (SPA) visualizing St. Paul crime statistics
- Designed and implemented a REST API connected to a St. Paul crimes SQLite database serving crime data
- Integrated Leaflet and Nominatim APIs for interactive, map-based crime visualization

RADB in EdStem | Python, Relational Algebra, RADB

- Integrated a relational algebra Python interpreter into an online EdStem course
- Tool was adopted into Database I curriculum to support student learning of relational algebra

Golf Card Game | Python, Pygame

- Implemented the card game “Golf” in Python with a full GUI built using Pygame
- Designed with both Player vs. Player and Player vs. AI game modes with three difficulty levels
- AI uses Minmax Algorithm with Alpha Beta pruning and custom heuristics for optimal move selection

Work Experience

University of St. Thomas – St. Paul, MN

February 2026 – May 2026

Teaching Assistant, Database I

- Authored SQL and Relational Algebra assignment questions with automated grading scripts written in Python
- Designed sample relational databases structured with dummy data for student querying exercises

University of St. Thomas – St. Paul, MN

June 2025 – August 2025

Research Assistant (Student Tech/Acad III)

- Researched and evaluated RADB, an open-source Python-based relational algebra interpreter that translates RA notation to SQL queries via SQLAlchemy, as a candidate tool for classroom integration
- Successfully streamlined the University of St. Thomas's Database I course by implementing the interpreter for student use

USA Branding Group (Representing PepsiCo) – Madison Lake, MN

September 2025 – Present

Brand Activation Specialist

- Engaged with thousands of NFL fans at Minnesota Viking tailgates to boost brand appreciation and visibility
- Distributed merchandise and expanded digital campaign outreach across 18+ states and 300+ individuals
